

# A PLAN OF THE PRACTICE FACILITY

## AT

# SIGNAL MOUNTAIN GOLF & COUNTRY CLUB

**A.** An 8k sq. ft. chipping / pitching green will be constructed that will allow players to practice every variety of short game shot that they may face on the course.

**B.** A 20k sq. ft. chipping / pitching area shall be constructed adjacent to the green. Dotted with hummocks and hollows, the tightly mown turf will allow players to practice an extremely wide variety of approach and recovery shots.

**C.** A laser-leveled teeing ground will be built, doubling the size of the current hitting area.

**D.** A +/- 1,500 square foot bunker will be built adjacent to the green and will be angled in such a way as to allow golfers to practice both greenside and fairway bunker shots.

**E.** A covered, climate-controlled hitting bay will be constructed at the end of the range.
